WHY WORK WITH ME

- ✓ End-to-end ownership
- ✓ Clear, on-time delivery
- ✓ Business-first thinking
- ✓ Responsive communication
- ✓ Data privacy aware

TECH STACK

Data & BI

SAP

- SAP BW/4HANA, BusinessObjects, BEx
- Power BI (DAX), Tableau, Lumira
- SQL (Joins, Views, CTE), Databricks
- Python (Pandas, NumPy)

Web & App

- JavaScript SPA (HTML, CSS, JS)
- Node.js / Express backend
- Google Apps Script + Sheets API
- SAP ADT REST API integration
- Netlify Functions, WhatsApp gateway
- Web Crypto (SHA-256), GitHub Pages

What I Build

I help teams turn raw data into decisions and ideas into working software. On the data side I design data models, build BI dashboards (SAP BW, Power BI, Tableau), and write SQL/Python to make reporting fast and reliable. On the product side I ship complete web apps — from front-end to a serverless backend and integrations. I take a project from requirements to a deployed, documented result, and I handle sensitive (including healthcare) data with privacy in mind.

Selected Work

SAP Transport Manager (TR Automation)

FULL-STACK · SAP
INTEGRATION

Node.js SAP ADT API
WhatsApp

Web tool that automates the SAP BW transport flow — create Transport of Copies, release, and notify the Basis team — over the SAP ADT REST API.

Deliverable: web app +
Node proxy + custom
ABAP class

EduCatin — Health Education Web App

FULL-STACK · SOLO
BUILD

JavaScript Apps Script
Netlify

Mobile-first education app with a scored quiz engine, video watch-gating, e-certificate, and a serverless WhatsApp gateway.

Deliverable: live web app +
Google Sheets data store

KIARA — Digital Pregnancy Class

FULL-STACK · SOLO
BUILD

SPA Web Crypto
GitHub Pages

10-session QR-based learning app with SHA-256 ID hashing, anti-skip video gate, session resume, and an Apps Script backend.

Deliverable: deployed app
+ admin data flow

Executive & Financial Dashboards

BI DEVELOPMENT

SAP BW Power BI
SQL

Executive and financial dashboards tracking operational, finance, and HR performance to support decisions.

Deliverable: interactive
dashboards + data model

Patient Analytics Reporting

ANALYTICS

SAP BW BEx SQL

Analytical reports for patient trends and service utilization to support operational planning.

Deliverable: report suite +
query layer

Operational Data Pipeline

DATA ENGINEERING

SQL Databricks
Python

Silver/gold data notebooks modeling patient volume and institution summaries to feed reporting.

Deliverable: layered
notebooks + refresh flow

Services

BI & Dashboards

Data models, SAP BW / Power BI / Tableau dashboards, BEx queries, and report performance tuning.

<> Web App Development

Mobile-first web apps with quiz/education flows, video gating, QR entry, and serverless backends.

Data & Automation

SQL/Python pipelines, Google Sheets integrations, and automated PDF/DOCX report generation.

How I Work

1 - Scope

Understand the goal, define the deliverable, and agree on a clear, fixed scope before starting.

2 - Build

Develop with regular check-ins, share progress early, and keep the work reviewable end to end.

3 - Deliver

Ship the deployed result with short docs and hand-off. Flexible pricing: per-project or retainer.

Background

SAP BW / BI Specialist

Mitra Keluarga Hospital

Mar 2022 – Present

- Design and maintain SAP BW data models, InfoProviders, and transformations; build BEx queries and BusinessObjects reports.
- Develop Power BI and Tableau dashboards; tune query and report performance; ensure data quality.

SAP ABAP Developer — Internship

Mitra Keluarga Hospital

Sep 2021 – Mar 2022

- Built ABAP programs for parameterized medical documents; supported development, testing, and bug fixing.

Core Stack
